**Technology Experience:**

- Javascript, React, Gatsby, and NEXT.JS
- SASS, CSS, Styled-Components, HTML
- Firestore Auth, and firestore noSQL database
- GraphQL
- SVG, basic design in Figma
- Linux

## Objective

I'm a full stack software developer, looking for a job where I can learn more, and really enjoy the depths of the coding possibilities. Below are some examples of my projects to date.

## Projects

### My Portfolio

Need a place to show my latest projects, My portfolio is simple but all the code is mine. I used storybook to build all the components.

[GitHub Repository](#)

[Live Site](#)

### Big 6 – Progressive calisthenics fitness app.

A full stack PWA using NEXT.JS, with Firebase AUTH, and Firestore noSQL database. I needed a logbook for my calisthenics, so I built one for the fun of programming and the joy of calisthenics.

[Live Site](#)

### Vertigo Rock Climbing

A front-end app using Gatsby, great fun being creative and doing the animations. My friend in Mexico runs a rock-climbing business, and thought I could make him a website for fun. Turns out getting content from costumers is my weakness here as I can't get him to give me any content.

[GitHub Repository](#)

[Live Site](#)

**Hobbies:** Mountain Biking, Rock Climbing, and programming.
